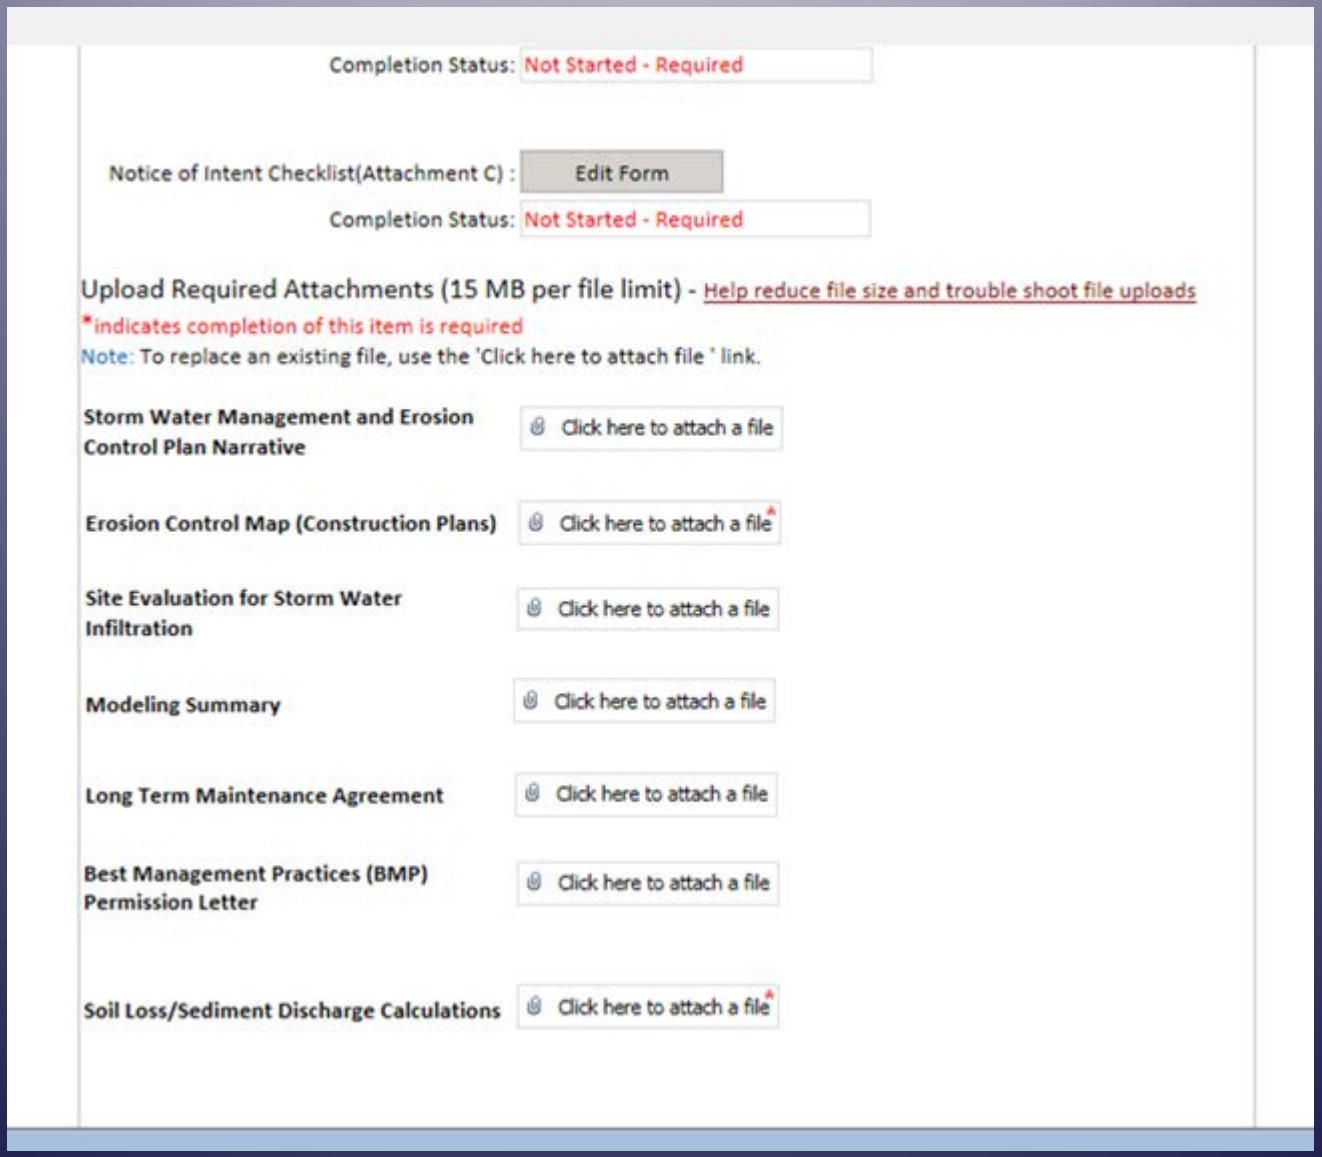
Webinar Content
Wetland Screening and Delineation requirement coming June 1, 2016
When to Apply for an Artificial Wetland Exemption
Applying with the Online Permitting System
Other Wetland Program Updates
Question and Answer Opportunities

On **June 1, 2016,** the Department of Natural Resources will require full implementation of the "Wetland Screening and Delineation Procedures" guidance. This guidance establishes a revised process requiring customers applying for storm water, CAFO (Concentrated Animal Feeding Operations), and waterway and wetland permits to submit a verified wetland delineation when wetlands are present in or adjacent to a project area. This guidance was developed to facilitate a more streamlined permit review because wetland boundaries will have been addressed on a project site prior to permit application submittal. The wetland review process will be uniform statewide, ensuring consistency amount the three most frequently used permit programs.
The purpose of the webinar is to provide an overview of the revised "Wetland Screening and Delineation Procedures" for construction sites, a clarification of when to apply for an "Artificial Wetland Exemption", and other related program updates.

ePermitting



Technical Standard Updates

- Permeable Pavement
- Land & Water Applied Polymers
- Vegetated Treatment Swale
- Site Evaluation for Infiltration
